

Dear Valued Customer's & Vendors

We have had several customers ask us about our operating status, at this time we are still operating the facility using additional guidelines and practices to limit visitors and protect the health and well-being of our employees, suppliers, customers and their families.

The current situation is very dynamic, and we wanted to provide you with an update. As more states go to lockdown, we must ensure that we are following federal, state and local guidelines for our operation. It is our belief that we are an "essential industry" and many of our suppliers and customers fall into that same category. Currently, we intend to continue operating the business and producing critical & essential "precision machined components" for our customers.

Avanti Engineering, Inc/ JNR Custo-Matic Screw, Inc. is a supplier of essential "Precision machined components and services" to multiple entities that are considered "Essential Critical Infrastructure" industries in accordance with the March 19, 2020 Memorandum on Identification of Essential Critical Infrastructure Workers During COVID-19 Response from the Cybersecurity and Infrastructure Security Agency of the U.S. Department of Homeland Security. These Essential Critical Infrastructure industries include Healthcare and Public Health, Critical Manufacturing, Transportation Systems, Information Technology, and Defense Industrial Base.

If you feel your operation is an "essential industry" that must maintain operation during a lockdown in your state, you should approach your local and state government officials for documentation.

I am attaching a copy of the March 19, 2020 memorandum and guidance from the U.S. Department of Homeland Security in support of Avanti Engineering, Inc/ JNR Custo-Matic Screw Inc. being a critical infrastructure industry.

We are asking our sales team to stay in contact with all of our customers to ensure we are current on your specific situation related to ongoing and future operations. If you expect to see a surge or decline in demand, please notify us to we can plan accordingly.

We appreciate your business and support in these challenging times, please contact us if you have any questions.

Sincerely,

Rocco J. Bratta
President
Avanti Engineering, Inc.
